Depending on the number and themes of the selected papers, more than one volume may arise.

The provisional contents of this book will include (but will not be limited to) the following:

- Mathematical Models and Algorithms
- Coding and Information Theory
- Cryptography and Cryptographic Protocols
- Electronic Money
- Smart Cards
- Expert Systems
- Security of Information Systems
- Network Security
- Security of Infrastructure
- Educational Informatics
- Educational Software

The intention of this book is to provide a concise coverage to the particular topic from the vantage point of a newcomer. As such, each chapter must be complete within itself.

Each paper must include an abstract, as well as a bibliography of references to additional or more advanced material. Co-authored papers are acceptable.

In order not to delay publication of the book, please keep in mind the following:

Important Dates

30 September 2018: Authors are invited to submit a tentative title and short abstract of their proposed papers as well as their 5 line brief author resume (CV) for possible inclusion in the book.

15 October 2018: Acceptance decision and invitation to submit the full paper.

15 January 2019: Draft papers due

15 February 2019: Feedback to the authors

1 to 15 March 2019: Final paper due

Expected publication date: Mid 2019
